

IT'S HOW WE CONNECT

GET YOUR SOFTWARE
WITHOUT THE HARD COSTS

BUSINESS

GET AHEAD IN THE CLOUD

Modern software has the power to deliver serious operational advantages. The problem is the more you want to gain, the more you need to spend. Until now.

SaaS (software as a service) is a cloud computing technology that provides instant access to enterprise grade applications for an easy monthly fee. It means any business can gain the same software advantages as their biggest competitor.

LEADING BUSINESS SOFTWARE FROM AN AUSTRALIAN BUSINESS LEADER

T-Suite® is Telstra's SaaS solution. It lets you access world-class business applications over world-class broadband networks – including Telstra Business Broadband and the Next G™ network.

The long list of available software includes the latest communication, collaboration and CRM applications from Microsoft®. Plus there are applications to help you streamline your accounting, HR compliance, IT security and more.

T-SUITE CAN HELP YOU:

- Access and use enterprise grade applications cost-effectively
- Improve cash flow through predictable monthly costs
- Respond more effectively to customers
- Secure your web connection and business critical information
- Reduce the complexity of your IT systems and support
- Improve staff productivity
- Free up resources for more productive tasks

RELIABLE, ACCESSIBLE, SIMPLE

Our unique combination of software and networks makes T-Suite a total solution. It's robust, reliable and secure, so your staff can confidently access the applications they need from the office, their home or a client's site.

There are no upfront costs and reduced ongoing IT demands to worry about – and adding applications or purchasing extra licenses is simply managed via our user-friendly online console.

So instead of spending time and money on IT maintenance, T-Suite will let you invest more of both in your business.

BUSINESS

'By using this technology and remodelling our systems, we have streamlined how our project teams work and are reaping the benefits.'

Dennis Wong, Operations Manager, Intrec Management.

MANAGE MY COMMUNICATIONS

T-Suite® Domains

An online presence isn't just part of your business brand and identity. It can also provide you with greater exposure and give customers more ways to find and interact with you. Having the right domain name for your business is an essential business asset. T-Suite Domains gives you an easy way to search and register the business domain name you want.

Exchange Online

On-demand communications can give you a key competitive advantage; it can improve productivity and help your business offer superior customer service. Exchange Online is a hosted enterprise messaging solution that allows your staff to share synchronised contacts, calendar and task lists; and access integrated email whether they're in an office or on the road.

SharePoint® Online

Deliver more efficient workflows and a real business edge with this fully hosted collaboration solution. Bring people, documents and information from different locations together with a central online location which they can use to share files, store resources, manage workflows and maintain project oversight.

Office Live Meeting

Give your organisation the power to better connect and engage with employees, suppliers and customers from all over the world via online meetings, training sessions, seminars and events for as little as two people or as many as 250.

Office Communications Online

Eliminate internal walls and external distances, without sacrificing privacy or security. Office Communications Online provides enterprise grade instant messaging and presence functionality so your staff can communicate and collaborate as if they were working around one table.

Business Productivity Online Suite

Streamline your communications with the full suite combining the above four solutions into one cost-effective package. There is even a simplified, lower cost 'deskless worker' version that is ideal for staff members who typically spend a small portion of their working day using a computer but who still need to work effectively with colleagues.

Skoot™

Ever needed to distribute files that are too large to email? Skoot lets you do this quickly and easily. With Skoot you can send large files to 20 recipients at the one time, plus share files with non-Skoot users. You can even use Skoot for the most business-critical files thanks to its end-to-end encryption providing full security.

Hosted BlackBerry® for Microsoft® Exchange Online

Hosted BlackBerry for Microsoft Exchange Online from Microsoft is an add-on service for Exchange Online and Business Productivity Online Suite customers. The service enables customers to synchronise their Outlook inbox, calendar, contacts, tasks, and notes wirelessly – in near real-time. Service also includes Mobile Data Service (MDS) for internet access. Hosted BlackBerry® for Microsoft® Exchange Online supports BlackBerry mobile devices manufactured by RIM.

BUSINESS

SECURE MY BUSINESS

T-Suite® Remote Backup MozyPro® PC

If you lose business data, you could also lose business. Prevent data loss and ensure quick and easy recovery with T-Suite® Remote Backup MozyPro® PC for PCs and laptops. It automates backup and stores your data in a secure off-site facility for added protection.

T-Suite® Remote Backup MozyPro® Server

As one of your most valuable business assets, your server warrants serious protection. T-Suite® Remote Backup MozyPro® Server ensures rapid recovery of your business data. Choose between manual or automatically scheduled backups, store your deleted files for 30 days, and store your data securely off-site.

McAfee® SaaS Endpoint Protection

New threats like spam, phishing, viruses and hackers are emerging. The danger is they can steal your valuable data and disrupt your network. McAfee SaaS Endpoint Protection Service is an always up-to-date safeguard for your desktops and file servers. It protects against all known threats with minimal disruption.

MessageLabs™ from Symantec Hosted Services

Guard against external and internal threats to your network. MessageLabs services will protect your systems from email threats like spam, phishing and viruses as well as from web threats like spyware and internet viruses. But, just as importantly, it also filters and blocks inappropriate content and web use from your staff.

MANAGE MY HR COMPLIANCE

Workforce Guardian

Workforce Guardian is an easy and affordable online employment relations service, which helps you comply with the Fair Work Act. It's been specifically designed to help you proactively manage everyday staff issues. You can also create employment agreements, and securely access your employee information.

MANAGE MY ACCOUNTING

Xero Online Accounting

Xero is an easy but powerful online accounting system, with no upfront costs or complicated installations. It automates a range of day-to-day bookkeeping tasks, while giving you and your accountant a real-time view of your bank transactions, invoices, reports and more.

MANAGE MY CUSTOMERS

Microsoft Dynamics® CRM

Now you can get closer than ever to your customers. Dynamics CRM is a sophisticated customer relationship management system that integrates vital customer information in one place, making it easier to plan and co-ordinate marketing, sales and service strategies and processes.

WORKetc

WORKetc is an integrated online solution combining CRM with project management, billing and more. It takes everyday systems and activities, automates and links them via a secure intranet connection to free up your staff from operational burdens, so that you can focus on more profitable tasks.

30-DAY TRIAL*

ON SELECTED

T-SUITE SERVICES

THINGS YOU NEED TO KNOW: *The trial period is available for an initial order for each service only (except Workforce Guardian and Domains). Trial for Remote Backup MozyPro® PC is the 5GB plan only and the Remote Backup MozyPro® Server is the 10GB plan only. After the trial period, charging for each applicable service will commence except for Microsoft Online Services. If you have agreed a minimum term as part of your initial order, and you cancel the order after the trial period, the early termination charges in Our Customer Terms will apply. Microsoft Online Services trial via the Business Productivity Online Suite (which includes: Microsoft Exchange Online, Microsoft SharePoint Online, Microsoft Office Live Meeting and Microsoft Office Communications Online) or via Business Productivity Online Deskless Worker Suite (which includes: Microsoft Exchange Online Deskless Worker and Microsoft SharePoint Online Deskless Worker) is limited to 20 users and expires after 30 days. Trial for Remote Backup MozyPro® PC is the 5GB plan only and the Remote Backup Mozy Pro® Service is the 10GB plan only. After the trial period, you may choose to convert your trial users to a paid subscription for the suite or any of the individual Microsoft Online Services applications. No early termination charges apply for not converting to a paid subscription. User information and data, including mailbox content, hosted data and other related settings, will be deleted from those Microsoft Online Services applications for which you have not converted to a paid subscription within 30 days after the expiry of the trial. © 2010 Symantec Corporation.
